Title

Knock 2 Unlock

About

Smart locks have created a new home security experience with customization features and functionality designed to give you control over what happens to your home. They go way beyond the capabilities of ordinary locks.

Application

- We can use it for,
 1. Bank Lockers
 2. Secret Lockers
 3. Cupboard Lockers

Operation

Setting knock pattern:

- Hold the push button and knock the door as you want and leave the button and wait for a minute to process
- Now knock with your registered knock pattern, if you knock with wrong pattern red light will glow and if you knock with write pattern the door will unlock and green light will glow

Specifications:

- Solenoid lock of 12 V
- 3 rechargeable batteries of each 3.7v
- 8-ohm 0.5-watt speaker

Trouble Shooting

- Reset the Knock pattern
- Check if the batteries are working and replace them with new ones
- Switch off for some time and on it

Do's & Don'ts

- Handle with care
- Reset it carefully
- Try to remember the knock pattern
